PROFESSIONAL SUMMARY

Motivated and detail-oriented software developer with a solid foundation in programming, specializing in C++, C#, ASP.NET Core, and .NET Framework. Experienced in developing scalable, maintainable applications and passionate about clean architecture, modular design, and database-driven solutions. Quick to adapt, eager to learn, and continuously improving both frontend and backend development skills.

EXPERIENCE

Projects:

Desktop Application: Driver & Vehicle Licensing Department App:

- Developed in C# using a 3-tier architecture to promote modularity and scalability.
- Collaborated with a mentor to implement principles like Separation of Concerns.
- Achieved improved code organization and reusability.

[GitHub Link](#)

Web Application: MyShop:

- Built using ASP.NET Core and Entity Framework Core for seamless database integration.
- Focused on robust back end design and efficient deployment practices.
- Hosted publicly to demonstrate full-stack web deployment.

[Live Demo](#) | [GitHub Link](#)

School RESTful API:

- Designed a school management API with Clean Architecture in .NET Core.
- Applied repository and mediator design patterns.
- Implemented secure JWT-based authentication.

[GitHub Link](#)

E-Commerce Website:

- Built using .NET Core (back end) and Angular (front end).
- Developed RESTful APIs and used EF Core for data handling.
- Secured login/registration with JWT tokens.

[GitHub Link](#)

Chatting Application

- Real-time chat app using SignalR, .NET Core, and Angular.
- Created a responsive UI and secure communication channels.
- Deployed for public use.

[Live Demo](#) | [GitHub Link](#)

YouTube UI Clone:

- Recreated YouTube's layout using HTML and CSS.

[GitHub Link](#)

Twitter UI Clone:

- Mimicked Twitter's user interface using HTML and CSS.

[GitHub Link](#)

Tasks Management Web Application:

- Full-stack app using Angular and .NET Core.
- RESTful API integration and JWT authentication.

[GitHub Link](#)

Flutter To Do App:

- Practiced Flutter fundamentals with a simple task management UI.

[GitHub Link](#)

Flutter E-Commerce App:

- Implemented MVC pattern with Firebase integration for auth & storage.

[GitHub Link](#)

Flutter Admin Panel Web App:

- Built a basic admin panel for managing products, categories, orders, and users.

[GitHub Link](#)

Portfolio Website

- Built with GitHub Pages to showcase your skills, projects, and experience.

SKILLS

- **Programming Languages:** C++, C#, JavaScript, TypeScript, Dart
- **Frameworks:** Angular, .NET Core, ASP.NET Core, Flutter
- **Technologies:** Git, LINQ, ADO.NET, API, SQL, JWT Authentication, Entity Framework Core
- **Web Development:** HTML, CSS, Bootstrap
- **Concepts:** OOP, Data Structures, Algorithms, Unit Testing

EDUCATION

Bachelor of Petroleum Engineering

Faculty of Petroleum Engineering and Mining, Suez University

September 2016 - September 2021

LANGUAGES

Proficient in English (Speaking, Writing, and Reading)
